## Veneers

By improving the shape, colour and alignment of your teeth, you could also be transforming your entire outlook on life by gaining confidence, smiling and achieving more.

Porcelain Veneers are designed to cover stains, straighten teeth, close gaps, alter proportions and ultimately result in a beautifully natural smile that you won't want to hide.

Robin Warne, whose patients have been in the "10 Years Younger Magazine" with Nicky Hamilton Jones, has written several magazine articles and says it is one of the most life changing treatments you can have.

# Want A Natural, Even Smile?

A veneer is usually a very thin piece of porcelain or composite - a little like a false fingernail but stuck to the tooth much more strongly and much more permanently.

They can be used to close gaps, change colour and change the shape of teeth and often require very little preparation.

Veneers can be placed on single or multiple teeth depending on what your requirements are.

Veneers are often used where a person can't bleach their teeth as white as they would like - veneers can be made any colour and shade you want.

## Hollywood Smile

This is where the proportions of the teeth are ideal and the teeth widen in an arch so that all your teeth show when you smile - not just the front six.

Veneers and crowns are often used to achieve this.
